

Naveed Khan

Senior Product Designer · Design Systems · B2B SaaS

Karachi, Pakistan · navzkha@gmail.com · +92 346 2496173

Senior Product Designer with 10+ years of experience designing B2B SaaS, hospitality, cloud, healthcare, and marketing technology products. Strong expertise in design systems, workflow-heavy products, customer portals, onboarding, information architecture, scalable UI patterns, and AI-assisted design workflows. Spent 7 years on Cloudways, a managed cloud hosting platform later acquired by DigitalOcean for \$350M.

Work Experience

Senior Product Designer at Convesio

San Francisco, CA (Remote) · 2022 - 2026

- Owned end-to-end design for SaaS product workflows, customer-facing portals, dashboards, forms, and infrastructure-heavy user experiences.
- Extended reusable UI patterns and component foundations to improve consistency across product surfaces and reduce repeated design decisions.
- Partnered closely with Product and Engineering from discovery to delivery, translating complex technical requirements into simple, usable flows.

Senior Product Designer at Brainstorm Force

Remote · 2021 - 2022

- Designed SaaS and web-product experiences with a focus on usability, scalable UI patterns, visual craft, and conversion.
- Contributed to design system improvements, reusable components, and consistent interaction patterns across product and marketing surfaces.
- Collaborated with Product, Engineering, Marketing, and leadership to frame problems, explore solutions, and deliver polished user experiences.
- Supported faster decisions through clear design rationale, prototypes, critique, and documentation.

Senior Product Designer at Cloudways

Karachi, PK · 2014 - 2021

- Served as the design backbone for Cloudways, a managed cloud hosting platform with 50,000+ users at time of exit and later acquired by DigitalOcean for \$350M.
- Worked as the only product designer from 2016–2018, owning UX, UI, platform redesigns, design systems, brand identity, website design, and product delivery support.
- Led a 5-month platform redesign focused on onboarding, information architecture, workflow simplification, and UI consistency.
- Replaced fragmented UI decisions with scalable patterns that improved consistency and accelerated future feature design and development.
